

MULLER is the first globally acting industry and technology leader in tool making and automation technology for thin-wall plastic packaging. We are currently looking for highly trained people to join our dynamic team.

We are searching for our site in Fort Collins, CO, USA:

Automation Technician

We are looking for a qualified candidate to join our amazing team at Muller Technology. If you enjoy building and testing new products, you may be well-suited to become our next Automation Technician or Service Engineer. You will be instrumental in assembling, troubleshooting, and helping us create the highest quality products possible. The right candidate will utilize engineering drawings and electrical/pneumatic schematics to ensure results in product quality. If you've got the excitement and drive to assist us in making the world's best automation, while working for a company that's committed to your success and career satisfaction, we'd love to make you part of the team.

Responsibilities:

- Utilizing Engineering drawings, build, wire and qualify sub-assemblies, main assemblies, and final machine.
- Trouble shoot mechanical, pneumatic, or electrical problems as they may arise. Being proactive and communicating with other departments for solutions.
- Ability to set up final systems in accordance with internal and customer quality acceptance measures. Ensuring the final product is as specified, able to complete customer factory approval testing and is ready for installation.
- Service Engineers will have the opportunity to travel to customer sites for installations and startup of our unique automation.
- Fast paced, challenging and fun environment. We work hard but that doesn't mean we don't have fun. We have the best technicians in the business, you'll have to keep up.
- Ability to bend, kneel and work a sometimes physically demanding job.
- Able to work overtime and weekends if production schedules require it.

Experience:

- 2 years manufacturing experience in related field preferred. Bachelor's degree in engineering field or technical degree in automation with experience is ideal.
- Experience in AC, DC, three phase wiring
- Proficiency in reading and interpreting mechanical drawings, electrical and pneumatic schematics
- Conceptual knowledge of pneumatics and servo drive motors
- Experience as a commercial electrician or machine/automation maintenance technician is preferred.
- Willing to train the right candidate with minimal experience and certifications for an apprentice role
- Compensation DOE

Requirements:

- HAVE A POSITIVE ATTITUDE!
- Be a self-starter, listen and learn, work towards your goals, appreciate your peers and have fun.
- Our greatest asset is our Team. You must be able to work well with others and enrich the environment.
- A stern attention to detail and organization. We have an organized and well-run shop; you must be able to help us maintain and improve.
- Safety minded for yourself and those around you, always
- Knowledge in the proper use of common hand tools and measuring devices. Both metric and standard
- We encourage a positive and respectful environment. Have respect and patience for your co-workers and others while you learn and teach.

What can we offer you?

- Competitive compensation
- Generous time off to balance work/life
- Comprehensive benefits package
- Potential to travel to Switzerland
- Continuing education opportunities
- Location in Fort Collins, CO offers an abundance of activities and entertainment
- A team culture willing to improve processes, work toward a common goal and support one another

Working Conditions:

- If you can lift 50lbs, great. However, we want you to have the ability to think about ways to use other tools to lift heavy weight.

Are you interested?

If so, do not hesitate to send your application to: hr@muller-technology.com.
