

MULLER is the first globally acting industry and technology leader in tool making and automation technology for thin-wall plastic packaging. We are currently looking for highly trained people to join our dynamic team.

We are searching for our site in Conthey VS, Switzerland,

## Mold Design Engineer (f/m)

As Design Engineer you will be part of a young and dynamic team which is in charge to develop leading-edge technology for consumer and industrial packaging solutions in the food, non-food, healthcare and medical industry. For our team currently working out of Switzerland, Spain and the USA, we are looking for a talented and detail-oriented Design Engineer, experienced for carrying out a variety of innovative engineering duties. Thanks to our cloud base CAO system, you will be able to work remotely from anywhere in the world. For us digitalization and sustainability are reality!

### Responsibilities:

- Design injection molds on CAD-system 3D EXPERIENCE (CATIA V6)
- Develop & optimize plastic parts according to market & customer needs
- Establish 2D drawings, assembly drawings and assembly instructions
- Bill of material and integration in SAP-B1 of Mold structures
- Technical support to manufacturing and quality team
- Active participation to product and process R&D
- Design review and communication with customers

### Requirements:

- Mechanical Engineer or similar with experience in injection molding
- Deep understanding in manufacturing technologies and capabilities

- Good expertise in CAD-systems systems, ideally CATIA
- Proficient in English (written and spoken)
- Ability to work and collaborate in a team
- Familiar with ERP-system SPA-B1 would be an asset
- MICROSOFT OFFICE computer skills
- e.g. Word, Outlook, Excel, Power Point, Project

### We offer:

- Varied activity within an international group, in a state-of-the-art environment
- Independent and responsible work in a young and dynamic team
- Efficient tools and working methods
- Social and wage benefits of a modern company
